## What have we Accomplished?

- Tier 1 and Tier 2 Differential
  - Several workshops were held to discuss the methodology associated with the calculation of tiered rates
    - *Outcome:* Technical changes to methodology
- Replenishment
  - Workshop with groundwater basin agencies, discussion of different policy options and staff-prepared White Paper
    - *Outcome:* The Integrated Resource Plan process will be used to evaluate the benefits and cost of Replenishment
- Interim Agriculture Water Program (IAWP)
  - Metropolitan staff and California Avocado Commission representative provided information and staff prepared a White Paper on policy options
    - *Outcome:* Board direction to develop a long-term plan for IAWP; to be completed by December 2008

Pathways to Lasting Solutions

## What Remains?

### ▪ Treated Water Peaking Cost Recovery

- Several workshops discussed the options regarding peaking costs and cost recovery
  - *Possible Outcomes:* “Do Nothing”  
Recommend set of options or an option to the Board  
Continue to Discuss/Study

### ▪ Growth-related Infrastructure Cost Recovery

- Workshops on options, identification and ranking of criteria
- Preparation of a White Paper discussing options and criteria.
  - *Possible Outcomes:* “Do Nothing”  
Recommend set of options or an option to the Board  
Continue to Discuss/Study

3

## Reaching the Finish Line On: *Treated Water Peaking* *Growth-related Infrastructure*

### Options:

1. Staff to prepare Board Letters requesting direction and containing:
  - Options and Staff recommendation
  - Options, no recommendation
  - Meet again with LFFP Work Group to review Board Letter
2. Continue to meet and discuss to reach resolution/consensus

4

## Other Factors That May Be Of Greater Priority To The LRF Working Group

- Near-term Metropolitan rate increases
- Constraints to State Water Project deliveries
- Limited snow pack
- Declaration of drought in California
- Governor's Emergency Declaration
- Preparing for potential drought allocation
- Working to develop conservation programs, including conservation rate structures
